CAREER OBJECTIVE

A **Full-stack Engineer** focused on building interactive, user-friendly web interfaces using **React, Next.js**, and modern UI frameworks. Enthusiastic about **problem-solving** and **continuous learning**, with hands-on experience exploring **performance optimization, modern web technologies, software engineering principles**. A dedicated **self-learner** aiming to grow **System Design Expertise** while contributing to **impactful, scalable, and high-quality projects**.

SKILLS

Front-End: React js, Next js, HTML5, CSS3, Javascript, Typescript, ShadCN, Framer Motion, GSAP

Back-End: Node.js, Express js, Django, SQL, MongoDB, REST APIs, RAG

Tools & Technologies: Git, GitLab, Vercel, Azure, DigitalOcean, Postman, AI First IDEs, Skills, Mcp

Soft Skills: Communication, Highly Adaptable, Time management, Teamwork, Problem Solving

WORK EXPERIENCE

A Maze Venture (Dhaka, Bangladesh) **April 2026 - Present**
Software Engineer

- Developing interactive and responsive user interfaces using React and GSAP for smooth animations and enhanced user experience
- Building and maintaining backend services using Express.js and Django Rest Framework
- Designing and managing databases with PostgreSQL and SQL
- Collaborating with cross-functional teams to develop, test, and deploy on cloud
- Writing clean, maintainable code and following best development practices
- Debugging issues and optimizing performance across the stack

PROJECTS

- 1. FitTrack - A Complete Fitness Management Platform** [Live Link](#) | [Client Code](#) | [Server Code](#)
- Built a full-stack fitness tracker platform (MERN stack) with role-based dashboards for Admin, Trainer, and Members.
 - Integrated Stripe payments, JWT authentication, and Tanstack Query for secure, efficient operations.
 - Features Trainer applications, Class booking, Community forums, and Review system.
 - **Technologies:** React, Tailwind, Firebase, Node.js, Express, MongoDB; deployed via Firebase.

2. Plant Care Tracker - Smart Plant Monitoring Platform

[Live Link](#) | [Client Code](#) | [Server Code](#)

- Developed a comprehensive plant management app with watering reminders, health tracking.
- Implemented Google/GitHub authentication, advanced filtering/sorting, private routes and real-time care notifications.
- Features Plant CRUD, Sorting by care level / next watering date, Toast alerts, and a Modern UI with Lottie & Date-fns.
- **Technologies:** React, Tailwind, Firebase, Node.js, Express, MongoDB; deployed via Firebase.

3. NextGen Blog - A Complete Blogging Platform

[Live Link](#) | [Client Code](#) | [Server Code](#)

- Developed a dynamic blogging platform featuring user authentication (Email/Password & Google).
- Implemented blog creation, wishlist, featured blogs, and markdown-based content display with smooth animations and a responsive UI.
- Integrated Framer Motion animations, Interactive UI transitions, and Responsive newsletter subscription for an enhanced user experience.
- **Technologies:** React, Firebase, Tailwind CSS, Framer Motion; deployed via Firebase.

EDUCATION

BSc in CSE

2023 - Present

Brac University

LANGUAGES

Bangla: Native

English: Professional Working Proficiency
